Work Experience

OpenWeb (Formerly Spot.IM)
Backend Engineer, Tech Lead, Staff Engineer

Tel Aviv-Yafo, Israel
July 2018 - Present

- Worked as the senior engineer on the Engineering team at a social engagement platform company.
- Developed new services in Ruby, Elixir, and Golang, and helped design the 2.0 architecture of the company utilizing event sourcing designs.
- Maintained all legacy services of the company, and led the rewrites of various legacy components into the brand new architecture.
- Lead a team of developers in developing and designing the OpenWeb Moderation 2.0 platform, which handles ingesting, tagging, and moderating all of the user generated content of the platform at high scale, with a focus on speed, reliability, and efficiency.
- Currently, leading the Labs efforts on the Backend of OpenWeb, working as a "Special Forces Engineer" to handle highly advanced projects in short timeframes, helping push the technology of the OpenWeb Backend Infrastructure to new levels.

Signals Analytics
Software Developer, Data Scientist, Tableau Specialist

Netanya, Israel
January 2016 - April 2018

- Worked as a Software Developer and Tableau Expert for a big data analytics company.
- Changed many paradigms in the company by creating new tools and updating old ones to work much more efficiently.
- Developed and maintained a tool for unstructured text classification based on rules specified by analysts, now used in all projects in the company.
- Developed innovative models for extracting insights from big data in various industries.
- Became the point person on all Tableau related work and optimizations in the company.

Jamestown, L.P.
